Greater Houston Psychiatric Associates, PLLC

## Psychiatrist opportunity

Greater Houston Psychiatric Associates, PLLC is the largest group of providers delivering psychiatric care to the Houston market. Our diverse group of providers have obtained broad recognition by providing quality care in five different locations and is making a significant impact on the mental health of our community.

While a strong workplace culture is important, a portion of that workplace culture includes a healthy work-life balance. As a provider with Greater Houston Psychiatric Associates, PLLC, you will have the freedom to specialize on a patient population in your area of expertise, to manage your schedule as you see appropriate, and to take time off as you need. Call sharing with the group means you are only on call 3-4 weekends a year with holidays rotated. Financial assistance is available to help you jump start your career as a private practice provider if needed. The work-life balance emphasis in our group culture includes a unique combination of autonomy with the support of an established medical group.

Greater Houston Psychiatric Associates providers have been providing mental health services since 2001. The group has an established infrastructure which includes access to an Electronic Medical Record (EMR), third-party contracts with insurance carriers and organizations, and electronic billing services to collect third-party payments. Benefits include medical insurance and a retirement plan that is optimized to maximize growth and minimize taxes. You will also have the ability to identify talent and develop the culture you want, but the challenges of running an office, from the mundane to the critical, are either managed for you (payroll, taxes and human resources) or you will be provided with mentorship, guidance and collaboration (lease, furniture, supplies).

Finally, as a provider with Greater Houston Psychiatric Associates, you will have access to ancillary services including therapist collaboration in the office, Physician Directed Intensive Outpatient Programs (PD-IOP) at three of our locations, and Treatment Resistant Depression (TRD) programs including Transcranial Magnetic Stimulation (TMS), and esketamine treatment. You will also be presented with the opportunity for professional growth and leadership as an owner instead of an employee.

Greater Houston Psychiatric Associates, PLLC is currently looking to add providers to the group. To learn more about this exciting opportunity, please contact us at [jobs@ghpa.net](mailto:jobs@ghpa.net)
